A & G King Timber - Dumfries

A & G King Timber is an active sawmill based in Lockerbie, Dumfries. Having big warehouses and multiple delivery vans, the company started to look for future proofing methods to invest in. Renewable energy with its cost reduction benefits and ROI made the directors investigate to reliable companies to help design and install an effective system best for their needs.

Renew-Able's Intervention:

- Solar Panels: Trina Vertex S 425W Solar Panel
- Inverter: Solis 50Kw s5 3 Phase Inverter
- EV Charger: 22Kw EV Charging Unit

Client Testimonial:

"Since investing in renewable energy, A & G King Timber has seen multiple advantages from cost benefits, an attractive return on investment (ROI) to the crucial aspect of futureproof they wanted to attain. The solar panels installed have significantly reduced their energy costs and over time the business is hoping to translate this into enabling the mill to allocate resources to modernise equipment, expand capacity and improve product quality. Furthermore, these investments reduce the dependency on fossil fuels, protecting against energy price fluctuations helping to futureproof their business".
