Argyll Hotel - Sauchiehall Street, Glasgow

Argyll Hotel is a traditional family-run 3-star hotel providing accommodation in Glasgow city centre, near many popular landmarks. Situated on Sauchiehall Street, within walking distance from some of Glasgow's best attractions creates tremendous footfall for both the hotel and its restaurant.

Argyll Hotel chose to investigate renewable primary due to the potential cost benefits and favourable return on investment (ROI). Renewable energy helping to significantly reduce electricity expenses and operation costs for the hotel became a main factor, giving the hotel the potential to reallocate funds to improve or expand their services.

Renew-Able's Intervention:

- Solar Panels: 400W Solar PV Panel installation
- Inverter- 7KW Inverter

Client Testimonial:

"After investing in renewable energy Argyll Hotel has benefits with the significant cost reductions on their electricity bills. Over time, these cost savings were substantial allowing the hotel to direct resources towards guest experiences, upgrading facilities and opening a restaurant within their establishment".
